

CONFIDENTIAL

24 April 1957

25X1

Dear [REDACTED]

25X1

In answer to your inquiry of [REDACTED] dated 4 April 1957, I have compiled the following information.

25X1

The instruments about which you desired information, the Stereo Slope Meter and Stereo Elevation Meter, are no longer being manufactured. It was determined, through evaluation, that the accuracy desired of the instruments could not be obtained from volume-produced models. Further, the manufacturer decided that the cost of individual production of the items would be too great for the market for which the instruments were designed. The manufacturer stopped production on both instruments about six months ago.

I have been able to obtain copies of descriptive brochures and instruction manuals for each of the instruments and these should contain the answers to any additional questions you have about them.

If there is further information that you desire, or if I can be of help in any other matter, please do not hesitate to drop me a note.

Sincerely yours,

Arthur C. Lundahl

Enclosures:

1. Instruction manual and Brochure for Stereo Elevation Meter.
2. Instruction Manual and Brochure for Stereo Slope Meter

Distribution:

- Orig. & 1 - Addressee
1 - [REDACTED]
1 - Ch/D/GP.
